

DT 169 TIMBER PRODUCT TECHNOLOGY**Semester 2 2016 / 2017****Proposal for artefact for restoration**

Practical work will start during Semester 1, you will need to have your artefact insitu for this time (approx. Week 6). I will use working on these projects to demonstrate learning required for your Applied Materials Module, ie assessing repairs, identifying components and parts and how furniture is constructed while also identifying finishes and how to remove or revive them.

Chose an Artefact of Furniture from approximately pre 1950 that you would like to restore, repair or repurpose.

Give some details of this Artefact, when it was made and who designed it, what period it dates from. Give the materials it was manufactured from and finish that was applied to it.

Give details of how you propose to repair it.

Your Artefact must have at least **5 items** in need of repair from the list below

Loose Joints

Broken Joints

Damaged or missing mouldings (applied or solid)

Damaged carvings or sculptured work.

Damaged or missing veneers or Inlays.

Damaged or worn rebates or grooves

Damaged or missing components.

Surface dents, stains or scratches.

Damaged or loose fitting drawer or door (other).

Damaged upholstery.

Damaged or missing Ironmongery.

Material cracks or splits. (eg solid wood cabinet backs, drawer bottoms etc.)
